

Climate Change: Causes & Effects™

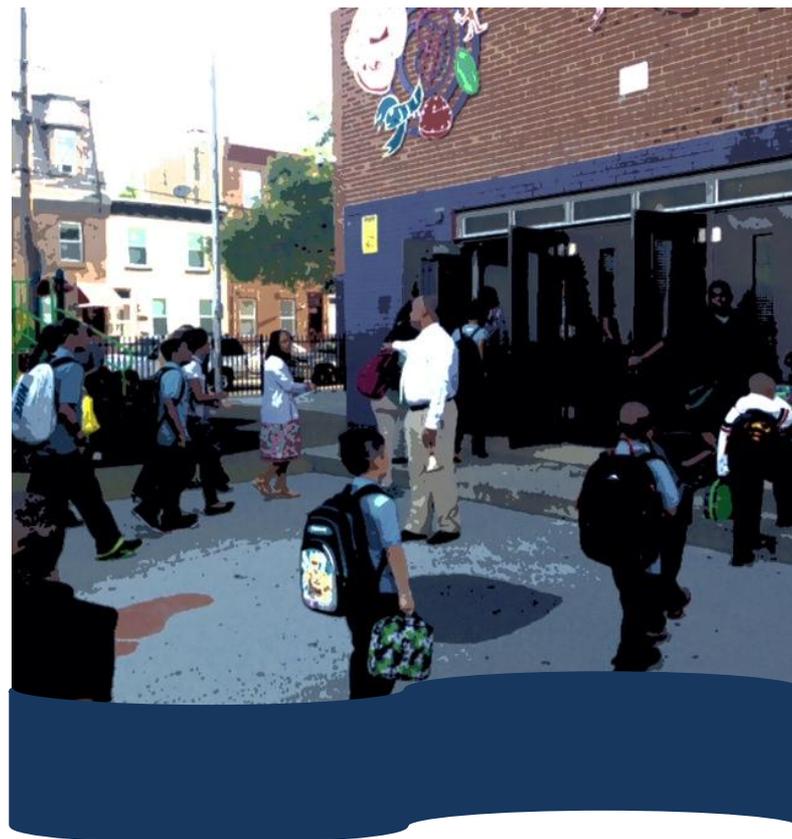

Education for sustainability in the early years is a valued, yet under-practiced field. Early childhood education lays a social and physical foundation for development and lifelong learning. It's our goal at Techbook Online to use animation and images to foster values, attitudes, skills and behaviors that support environmental advancement.

Introduction

Brainchild™

It was the first day of school and all the students were prepared to learn. Carrying lunchboxes and book bags, smiling children quietly walked inside the school and went to their classrooms.

Once seated at their desks, the neatly dressed children - some wearing blue shirts and some yellow - looked up at their teachers, who shouted at the same time: *"We are going to learn about climate change today!"*

I never heard of
Climate Change.
I hope she
doesn't pick me...

Ms. Green, who has short brown hair, said: *"Raise your hand if you know what climate change is?"*

I DO! I KNOW!
PICK ME!

Chris was the first student to raise his hand. He had learned about climate change at summer camp. *"It's when Earth is sad," he said, proudly.*

The other teacher in the room, Ms. White - who has long brown hair - smiled as she said: "That's right Chris! Climate change means Earth is sad."

Isaiah, with a worried look on his face, asked: "Why is Earth sad?"

"Why is Earth sad?"

PAY ATTENTION:
Here's the
top 4 reasons
Earth is sad.

1 As humans burn fossil fuel, the planet warms.

Warmer Worldly™

ECONOLOGY

THE
ANDREW
GOODMAN
FOUNDATION

With basic knowledge of climate change's causes & effects, Ms. White instructs the students to color in the pictures of Warmer Worldly™ and the others.

Isaiah, excited to show-off his new school supplies, quickly pulls out his crayons and, through his imagination, brings each character to life!

Can you answer
these 6 questions
without looking
back in the
Techbook?

1. How many people died worldwide in 2012 from air pollution?
2. Why is the planet warming?
3. What's causing bees and the crops they pollinate to face extinction?
4. What were the two teacher's name?
5. What was the student's name who raised his hand?
6. What are happening to the polar caps?
